CAKE IN A BOX RECIPE

Ingredients

1 can of Sprite
1 can of frosting

Instructions

- Preheat oven according to the temperature listed on the cake mix box.
- Grease pan with oil, butter, or cooking spray, or use parchment paper to prevent sticking.
- In a bowl, pour in the cake mix and add-in the entire can of Sprite. *Do not add-in eggs, oil or water. The Sprite does all the work!*
- Gently whisk or beat until smooth and bubbly.
- Pour batter into the prepared pan.
- Bake for the time listed on your cake mix box. Cake is done when the center springs back or a toothpick comes out clean.
- Cool completely and then frost!
